RouteMAN[©]

Route Management using Portable Data Collection
Capture "in-the-field" Periodical Transactions

Reduce Check In/Out Time and Dramatic Increase Data Accuracy

The DPS Route Management System is a series of hand held computers with integrated laser scanner and Irda (inferred data transmission – no cables required) strip printers utilizing application programs designed specifically for magazine and books in store service transaction processing. Utilizing the PSION "Workabout" Portable Hand Held Computer, the DPS Route Management System is the most efficient and effective way to process in-field transactions by title accurately capturing delivery and returns information.

Features	Benefits
<ul style="list-style-type: none"> • Magazine & Paperback Book Processing • Premature Return Indicator • Net Checking • Call-ins by Retailer or Overall • Full Copy Disposition Indicator • Invalid Issue for Sale or Reorder • Customer, Title, Issue Validation • Customer & Issue Specific Pricing 	<ul style="list-style-type: none"> • Reduces Check In/Out Time • Increased Customer Service & Satisfaction • Increased Sales Efficiency & Profitability • Dramatic Increase Data Accuracy • Reduced Return Room Processing • Increases Employee Job Satisfaction

The DPS RouteMAN can receive and store complete title, issue, and desired customer data in the portable hand held computers. The DPS RouteMAN captures the actual time and date of ALL recorded transactions, providing an extremely valuable reporting tool by which to measure productivity.
