The **BOSS VIP v5** from Data Processing Services, Inc. provides **Source Interlink Companies** the best *just-in-time fulfillment* with full pick verification in the industry!"

SOURCE INTERLINK COMPANIES (Nasdaq: SORC) Source Interlink Companies, Inc. provides supply chain management and other related products and services to national/regional retailers, magazine publishers, and other providers of home entertainment content primarily in the United States and Canada. SORC operates in three segments: Magazine Fulfillment, Compact Disk (CD) and Digital Versatile Disk (DVD) Fulfillment, and In-Store Services. The Magazine Fulfillment segment engages in the sale and distribution of magazines, including domestic and foreign titles, to specialty retailers and wholesalers. SORC also exports domestic titles internationally to foreign wholesalers or through domestic brokers; provides return processing services for retail book chains; and serves as an outsourced fulfillment agent. The CD and DVD Fulfillment segment sells and distributes prerecorded music, videos, video games, and related products to retailers. The Source Interlink Companies also provide consumer-direct fulfillment and vendor managed inventory services to its customers. The In-Store Services segment engages in designing, manufacturing, and invoicing participants in front-end fixture programs. SORC also provides claim filing services related to rebates owed retailers from publishers or their designated agent; designs, manufactures, ships, installs, and removes front-end fixtures, including wood and wire; provides information and management services relating to retail magazine sales to the United States and Canadian retailers and magazine publishers. Source Interlink is headquartered in Bonita Springs, Florida. (Yahoo Profile SORC: <http://finance.yahoo.com/q/pr?s=SORC> Aug. 2, 2005)

Paperless Picking: The **BOSS** enables a paperless, computer-directed picking solution engineered to increase picker productivity and accuracy. Pickers are provided with the most efficient travel path using illuminated beacon direction to proper extraction locations provided with a prominent quantity display of order requirements. Orders are downloaded to the **BOSS** server from the Source Interlink's host computer over their wide area network (WAN). DPS warehouse management guides Source staff to product to slot to DPS **exclusive engineered bulk and loose copy flow racks**. The flow racks are optimized for periodical picking using a "bumper" to halt bundle at loose copy sled shelf. Displays are located at each pick BIN slot.

Expertly Engineered Carton Packing Software and Technologies

- Zone-to-Carton-Full Optimization Reducing Carton Handling
- Efficient Carton Size Selection Utilization Reducing Supply Costs
- High Velocity Pick Segregation Improving Carton Through-put
- Optimum Carton Flow Design Increasing Carton Travel Rate
- High Density Pick BIN Zones Reducing Picker Travel Path
- Pick Velocity Flow Rack Ergonomic Optimization Reduces Fatigue
- Ergonomic Flow Rack Integrated Pick to Conveyance
- Multiple Full Carton Take-Ways Reduce Cartons in Pick Area
- Center Integrated High Speed Conveyance Carton Take-Away
- Exclusive Circulation Loop Directs Quality Control / Pack-out Flow

Find The Bad Picks and Deliver the Correct Distribution: Fewer people pack more cartons with less errors faster than ever before using efficient carton packing and optimum carton flow. Errant picks are discovered as cartons travel out the center take-away through the circulation loop with identification and pick verification by an un-attended "check-weight-scale" diverting automatically to quality control audit stations ONLY out-of-tolerance cartons. Each QC station is computer assisted to quickly identify pick errors and either send the carton to pack-out as corrected or send directly back to Pickers to capture missed picks.
